**REVISED NOTIFICATION OF
SAN DIEGO GAS & ELECTRIC COMPANY'S
REQUEST TO DECREASE ELECTRIC RATES
AND INCREASE GAS RATES
APPLICATION A.22-03-005**

WHY AM I RECEIVING THIS REVISED NOTICE?

On March 4, 2022, San Diego Gas & Electric Company (SDG&E®) filed its application of San Diego Gas & Electric Company (U 902-M) to Adopt Energy Efficiency Rolling Portfolio Business Plan Pursuant to D.21-05-031 (A.22-03-005) with the California Public Utilities Commission (CPUC) for approval of its eight-year business plan. The original notice, issued in the March 2022 billing cycle, was consistent with the methodology for calculating rates in the application and used the November 2021 rates to calculate 2023 rate impacts, rather than January 2022 rates pursuant to SDG&E's interpretation of guidance from the CPUC. This revised notice better reflects the customer bill impacts associated with the Energy Efficiency Business Plan. This will result in a decrease in electric rates and an increase in gas rates, starting January 1, 2024.

The application is requesting a total of \$713,923,230 for the period of 2024-2031. If the application is approved, SDG&E will recover forecasted costs in electric and gas rates over an 8-year period beginning January 1, 2024.

WHY IS SDG&E REQUESTING THESE CHANGES?

- SDG&E was required by CPUC Decision (D.) 21-05-031 to file an application containing an eight-year business plan and four-year program portfolio. SDG&E is submitting this application to comply.

(Continued inside)

- The business plan serves as a strategic plan for SDG&E's energy efficiency programs, metrics, and an eight-year budget.
- The program portfolio contains detailed program descriptions; annual budgets, totaling to a four-year revenue requirement; cost-effectiveness showings over the four-year period; and implementation plans, or links to them, for all programs that are currently operating or planned to operate during the four-year portfolio period, with the exception of third-party programs where the contract has not yet been awarded.

HOW COULD THIS AFFECT MY MONTHLY ELECTRIC AND GAS RATES?

If SDG&E's rate request is approved by the CPUC for 2024, a typical residential customer's electric bill on Schedule TOU-DRI using 400 kWh per month would decrease by approximately \$0.66 or 0.4% per month in 2024, compared to 2023. The average residential customer's gas bill using 23 therms per month would increase by approximately \$1.10 or 2.4% per month in 2024. Individual customer bills may vary.

HOW DOES THE REST OF THIS PROCESS WORK?

This application will be assigned to a CPUC Administrative Law Judge who will consider proposals and evidence presented during the formal proceeding. The Administrative Law Judge will issue a proposed decision that may adopt SDG&E's application, modify it, or deny it. Any CPUC Commissioner may sponsor an alternate decision with a different outcome. The proposed decision, and any alternate decisions, will be discussed and voted upon by the CPUC Commissioners at a public CPUC Voting Meeting.

Parties to the proceeding, including the Public Advocates Office, may review SDG&E's application. The Public Advocates Office is
