

SAN DIEGO GAS & ELECTRIC COMPANY
NOTICE OF ELECTRIC RATE DESIGN WINDOW APPLICATION
APPLICATION NO. A.05-02-019

On February 18, 2005, San Diego Gas & Electric Company (SDG&E) filed its Electric Rate Design Window Application (A.05-02-019) with the California Public Utilities Commission (CPUC or Commission), asking for approval to change certain rates for our customers. The application proposes no changes to total revenue but proposes new revenue allocations and rate design that changes how we allocate costs among our customers. Utility charges on your bill include revenues for transmission (the process of moving energy from one region to another), distribution (the process of delivering energy at the local level) and energy. Both distribution and energy rates are changed in this application. If approved as filed, SDG&E customers would see the following changes:

EFFECT ON ELECTRIC RATES AND BILLS

If the Commission approves SDG&E's request, a typical residential customer living in the inland climate zone and using 500 kWh per month will see a monthly winter bill increase beginning in January 2006 of 0.9%, or \$0.63. A typical monthly electric bill will increase from \$68.98 to \$69.61. The percentages shown do not necessarily reflect the changes that you may see in your bill. Changes in individual bills will depend on how much energy each customer uses.

The following chart shows the electric rates changes SDG&E is requesting for 2006.
