

Lianna Rios

New Construction Supervisor

Lianna Rios assumed her role with SDG&E's Savings By Design program in 1999. She is responsible for assisting building owners, tenants & design teams in designing high-performance buildings, using an integrated design approach to achieve maximum results in efficiency. She is also instrumental in promoting SDG&E's new Sustainable Communities Program, which encourages ultra-high performance buildings, sustainable development and promotes green building design practices in SDG&E's service area. She began with SDG&E as a program manager responsible for communications efforts, as well as planning, designing, and implementing trainings and events. Lianna holds a bachelor's degree in business administration with an option in international business from California State University, Fresno.
