## **Executive Summary**

#### **Overview**

This report on San Diego Gas & Electric Company's (SDG&E) portfolio of Low Income Energy Efficiency (LIEE) Program provides information on program accomplishments and expenditures for program year (PY) 2008. SDG&E's LIEE program<sup>1</sup> offers its low income customers weatherization services, energy efficient lighting, energy efficient appliances, and energy education at no cost to qualified natural gas and electric customers.

#### **Program Results**

The PY2008 LIEE program portfolio design and funding was approved by the California Public Utilities Commission (Commission) in Decision (D.) 06-12-038, issued on December 14, 2006, and modified by D.07-06-004 on June 7, 2007.

During PY2008, the LIEE program treated<sup>2</sup> a total of 20,804 homes and weatherized<sup>3</sup> 17,718 homes. As part of its comprehensive services to eligible LIEE participants, SDG&E provided in-home energy education to 20,411 customers; installed 3,277 energy efficient refrigerators, 112,796 compact florescent lamps (CFLs), 13,011 interior hard-wired CFL fixtures, 4,588 torchieres, 16,094 low flow showerheads, 486 room air conditioners; weatherstripped 15,705 doors; installed caulking to 15,023 homes; repaired or replaced 1,291 natural gas furnaces; and installed attic insulation in 421 homes.

Weatherization and appliance installations resulted in first-year energy savings of 6,797 mWh and 327 mTherms. The energy savings achieved through the 2008 LIEE program will contribute to the Commission's energy savings goals adopted for program year 2006 and beyond as set forth in D.04-09-060.<sup>4</sup> The average per home lifecycle bill savings for the 2008 LIEE program was \$468.

<sup>&</sup>lt;sup>1</sup> The LIEE program is also known as the Direct Assistance Program (DAP).

<sup>&</sup>lt;sup>2</sup> Per D.02-12-019, the Commission defines a "treated" home as an income-qualified home that has received any measure or service under the LIEE program, including energy education, compact fluorescent lamps, weatherization and appliances. Under the LIEE program, a treated home must receive all feasible measures for which it qualifies.

<sup>&</sup>lt;sup>3</sup> Per D.02-12-019, the Commission defines a "weatherized" home as a subset of treated homes, and are defined as incomequalified homes that have received any weatherization measures (e.g., weatherstripping and caulking) under the LIEE program.

<sup>&</sup>lt;sup>4</sup> Findings of Fact 13

SDG&E's total LIEE authorized budget for PY2008 was \$13,302,751. Unspent funds from prior years, totaling \$3,107,854 were carried over and used in SDG&E's PY2008 LIEE program. LIEE program expenditures during 2008 totaled \$16,420,247.

## **Low Income Energy Efficiency Program**

#### **Program Summary**

The LIEE program helps low income residential customers control energy costs by providing no-cost weatherization, energy efficient lighting, select energy-efficient appliances, appliance services, and energy conservation education. Communities targeted for LIEE participation by SDG&E are those where a majority of the households are at or below the income guidelines established by the Commission for the utilities' low income programs. In order to receive LIEE program services, the home must also meet the program's residence structural feasibility criteria in accordance with the Commission-adopted Statewide LIEE Policy and Procedures Manual.

During PY2008, SDG&E utilized an outside contractor, Richard Heath and Associates (RHA), to manage the field activities of its LIEE program. Under the LIEE program, RHA performed program outreach, enrolled customers into the program, assessed customers' homes and provided in-home energy education either during their assessment or at the time of the installation. RHA subcontracts the LIEE measure installations and Heating, Ventilation and Air Conditioning (HVAC) services to licensed community-based organizations (CBOs) and private contractors.

As reported in Table 1, SDG&E spent a total of \$16.420 million on its LIEE program. The annual energy savings realized during 2008 were 6,797 mWh and 327 mTherms.

#### PY2008 Low Income Program

During PY2008, SDG&E treated 20,804 homes and weatherized 17,718 homes. Throughout PY2008, SDG&E continued to offer qualified customers access to all customer assistance programs such as the California Alternative Rates for Energy (CARE) program, Family Electric Rate Assistance (FERA) program, Medical Baseline, and Lighting Turn-In events. By providing customers information on these programs, SDG&E is able to integrate marketing and outreach budgets while increasing program awareness at every opportunity possible. Marketing, education, and outreach efforts conducted during PY2008 include the following:

#### Marketing, Education & Outreach

### Integration<sup>5</sup>

- Utilized CARE and Medical Baseline enrollment data to identify LIEE-eligible households.
- Promoted LIEE through various SDG&E field personnel, such as field collectors and gas service technicians.
- Used CARE and Medical Baseline system enrollment information for analysis and identification of households that have a high potential for meeting the LIEE program eligibility criteria.
- Utilized SDG&E "My Account" customer data to identify LIEE-eligible customers who are more likely to respond to electronic communications.
   Launched three email campaigns to these customers.
- Cross promoted LIEE program during CARE door-to-door canvassing efforts.

#### **Outreach Efforts**

- Provided SDG&E prime contractor with mailing list information to coordinate community and neighborhood canvassing efforts.
- Worked with local city officials and the media to increase LIEE awareness and participation through in-home interviews with participating LIEE customers.
- Utilized 2-1-1 San Diego <sup>7</sup> to promote and educate clients about SDG&E's assistance programs, such as LIEE, CARE, FERA, Medical Baseline Allowance and Neighbor-to-Neighbor.

-

<sup>&</sup>lt;sup>5</sup> Integration as defined in D.08-11-031.

<sup>&</sup>lt;sup>6</sup> SDG&E's "My Account" is an on-line service for billing, payment, and other personalized on-line account information and services offered to all customers within SDG&E's service territory.

<sup>&</sup>lt;sup>7</sup> 2-1-1 is the dialing code for 24/7 access to information on community, health, and disaster resources. This community service is provided without charge by 2-1-1 San Diego, a non-profit organization. 2-1-1 has been set aside by the Federal Communications Commission as the phone number for confidential community information ranging from substance abuse treatment, care for a child, or volunteer opportunities.

- Worked with the City of Chula Vista to distribute collateral promoting conservation, energy efficiency and utility assistance programs to Chula Vista residents.
- Provided training and education on SDG&E assistance programs to the San Diego Refugee Forum in order to increase awareness and enrollments among hard-to-reach customers, such as those with unique language and cultural barriers.
- Worked with public assistance agency programs such as California Work
   Opportunity and Responsibility to Kids (CalWorks), Women, Infants, and Children
   (WIC), Head Start and others to enroll customers based on categorical eligibility.
   In 2008, 1,452 customers were enrolled in the LIEE program based on
   categorical eligibility.
- Worked with Rebuilding Together San Diego, Association for the Advancement
  of Retired Persons (AARP), and the North Park Business Association to host a
  community block party celebrating the renovation of a local resident's home. The
  event provided customers the opportunity to learn about energy efficiency,
  assistance programs, and other services offered by SDG&E and other local
  businesses and agencies.
- Provided SDG&E assistance program information at the Veterans of Foreign Wars (VFW) Hall renovation event in Sherman Heights, a predominately Hispanic community in San Diego. This event was hosted by Rebuilding Together San Diego and the U.S. Navy and was attended by a variety of potential LIEE customers, including veterans from various VFW Halls.
- Enrolled customers in the LIEE and CARE programs at the Salvation Army
   Holiday Events located throughout San Diego County in the month of December.
- Worked with ResponseLink of San Diego County, a provider of medical alert devices and services, to distribute LIEE, CARE and Medical Baseline collateral to clients and to provide them with light emitting diode (LED) nightlights designed to prevent slip and falls.

- SDG&E also worked with Health & Human Services, Union of Pan-Asian
  Communities, and the non-gaming Tribal Temporary Assistance for Needy
  Families (TANF) administration on efforts to educate their clientele who receive
  public assistance about SDG&E's assistance programs. These efforts will be
  expanded in 2009 in order to increase enrollments within these hard-to-reach
  populations.
- During 2008, SDG&E also began developing relationships with agencies that
  provide various services to clients with disabilities. SDG&E will continue these
  efforts in 2009 and will focus on agencies that offer assistance such as meal
  delivery, transportation, and health care.

#### **Expanded Outreach Efforts**

• In 2008, SDG&E expanded its outreach efforts by hiring an additional outreach team that worked directly with LIEE program management to generate awareness and increase leads for RHA. To ensure consistent messaging and delivery with the RHA outreach team, SDG&E's outreach team spent several days shadowing RHA field outreach personnel. The results were impressive with the internal outreach team enrolling over 2,900 customers in 2008. The combined efforts of both SDG&E and RHA resulted in 20,804 customers being served in 2008.

#### Marketing

#### Web

- SDG&E is continuously looking for new and better ways to educate and inform customers about its assistance programs and services. One improvement made in PY2008 was the redesign of the LIEE web pages. This revamp provided improved web functionality and design, resulting in simpler navigation and greater customer appeal. One of the specific upgrades that had a significant impact was the redesign of the on-line LIEE program interest form which allowed customers to find what they are looking for more easily while also decreasing turn around time for customers once forms are submitted. In addition, the enhancements helped simplify the on-line application process for customers while also reducing the likelihood of losing potential leads resulting from difficulties of navigating for information or completing interest forms.
- SDG&E also ensures the most up-to-date program information is posted on the LIEE web pages, including the LIEE program's income guidelines updated by the Commission on June 1<sup>st</sup> of each year.

### Telephone

 Launched outbound calling campaigns to (1) customers who did not respond to the LIEE program direct mail and (2) customers enrolled in the CARE program, but not enrolled in the LIEE program at the time of the campaign.

#### E-Mail

 Launched email campaigns to low-income internet users who are more responsive to on-line communications versus other more traditional communications, such as direct mail or community events.

#### **Direct Mail**

 Launched direct mail campaigns to residents living in zip codes believed to have high concentrations of potential LIEE customers.

#### **Television**

- Partnered with Cox Communications to feature a story about the LIEE program on a produced segment called "Go Green" on Channel 4's news magazine, the San Diego Insider. The segment ran for several weeks for during the months of October and November and showed the LIEE program at work, shared its mission and featured a customer that benefitted from LIEE services.
- Ran thirty-second television advertisements, featuring the LIEE program, for eight
  weeks during the months of October and November on the following channels
  (San Diego zip codes only): Animal Planet, BET, SD4 Insider/Postgame,
  Padres/Replay, the Sci Fi Channel, Speed, TBS, TNT, Travel Channel, USA,
  Versus.
- Ran an LIEE program message scroll along the bottom of the Weather Channel station for zip codes in San Diego County during the month of November.

	<u>TV</u>	
Language/Station	<u>Gross</u>	<u>Area Served</u>
	<u>Impressions</u>	
<u>English</u>		
SDI (Cox Interconnect*):	4,651,500	San Diego County
*incl: Animal Planet, BET, SD4 Insider/Pos USA, Versus	tgame, Padres/Replay, Sci	i Fi, Speed, TBS, TNT, Travel Channel,

#### **Print**

 Ran print insertions in the *PennySaver* and *Union Tribune* local mailers (in English and Spanish) for the LIEE program. Below is a table showing the circulation for each publication.

	PRINT	
Language/Publication	<u>Circulation</u>	<u>Area Served</u>
English + Spanish		
Union Tribune - MicroZone Inserts	104,968	San Diego County
Pennysaver	115,200	San Diego County

#### Radio

Purchased radio air time for disc jockey (DJ) ad libs, which are non-scripted 30-second radio advertisement spots where the DJ speaks about the LIEE program in Spanish and Vietnamese (see estimated reach by station below). During these spots, radio personalities spoke of the benefits of the LIEE program to their listeners. The LIEE program radio advertisements were leveraged with the CARE program to reduce media cost, gain more interest, and encourage customers to enroll. SDG&E advertised with the following radio stations:

	<u>RADIO</u>	
Language/Station	Est. Audience	<u>Area Served</u>
<u>Spanish</u>		
XHTY-FM	105,000	San Diego County
XLTN-FM	80,000	San Diego County
KLQV-FM	100,000	San Diego County
KLNV-FM	168,800	San Diego County
<u>Vietnamese</u>		
Radio TNT San Diego	13,000	San Diego County

#### **Community Events**

Distributed collateral and enrolled customers at five "Cable Converter Box"
events held at four different Cox Communications retail stores. The cable
industry is gearing up to convert all televisions to digital in 2009. Typically,
digital conversions have a greater impact on low-income audiences due to the
expenses related to digital television equipment and services.

#### Regulatory Compliance and Oversight, Measurement and Evaluation Activities

### Regulatory Compliance and Oversight

During 2008, SDG&E's LIEE program complied with Public Utilities Code (PU Code) Sections 327 and 381.5. The local CBOs participating in SDG&E's program leveraged their LIEE program funding with funding they received under the State of California Department of Community Services and Development (DCSD) Low Income Home Energy Assistance Program (LIHEAP) weatherization program.

Section 2790 of the PU Code mandates that the LIEE program provide as many program energy efficiency measures as feasible to eligible customers served in the program. In addition, Section 2790 provides that the Commission will determine whether the measures are feasible, taking into consideration both cost-effectiveness of the measures as a whole and the policy of reducing energy-related hardships facing low income households. SDG&E's LIEE program installed all feasible program measures in all the homes served during PY2008. Additionally, SDG&E continued to revisit customers who received LIEE weatherization services prior to 2001, to provide the new program measures authorized by the Commission in D.01-05-033.

In D.06-12-038, the Commission directed the utilities to collaborate with the Energy Division to revise low income program reporting requirements, conduct public meetings every 90 days to facilitate program improvements, and to include a discussion of the benefits of energy efficiency programs in energy education materials for reducing greenhouse gases and promoting water conservation. In addition, D.06-12-038 directed SDG&E to competitively bid its LIEE program administration.

In D.07-12-051, the Commission directed the investor-owned utilities<sup>8</sup> (IOUs) to file a statewide strategic long-term plan that includes a plan to achieve the LIEE programmatic initiatives adopted in D.07-12-051 and consistent with D.07-10-032.

<sup>&</sup>lt;sup>8</sup> The IOUs consist of Pacific Gas and Electric Company (PG&E), San Diego Gas & Electric Company (SDG&E), Southern California Edison Company (SCE), and Southern California Gas Company (SoCalGas).

D.07-12-051 also directed the utilities to file 2009 through 2011 low income program applications for the LIEE and CARE programs no later than May 15, 2008. Further D.07-12-051 instructed the utilities to incorporate the following guidelines into their low income program and budget applications:

- Propose a portfolio that identifies the benefit-cost ratio for each program and a justification for each program that is not costeffective, as required in D.02-08-034 and according to the Commission's cost-effectiveness methodology;
- Be designed to achieve over the three-year budget period approximately 1/4<sup>th</sup> of the programmatic initiative;
- Demonstrate that all program elements included toward the achievement of the initiative are cost-effective using the total resource test adopted in D.02-08-034;
- Propose program elements that may not be cost-effective but that serve other important policy objectives and provide justifications for each consistent with D.02-08-034;
- Present specific strategies and programs for the budget years 2009-2011 toward accomplishing the LIEE programmatic initiative that emphasizes long term and enduring energy savings, ways to leverage the resources of other entities, and ways to integrate LIEE programs with other demand-side programs, especially energy efficiency programs;
- Propose Marketing, Education & Outreach programs to promote LIEE programs and the LIEE programmatic initiative, including a program element that targets renters;
- Propose a process for automatically qualifying all tenants of public housing and tenants of Section 8 housing improving information to public housing authorities;

- Eliminate or modify the ten year "go back" rule to permit installations of new measures and technologies in all households while avoiding duplicative installations;
- Propose ways to promote program continuity and long term LIEE investments with more flexible budgeting and funding rules, consistent with the practices;
- Propose specific program participation goals in specific population sectors or segments and budgets designed to meet those goals, consistent with D.06-12-038;
- Propose methods of tracking costs for each program element and participation in each that will permit cost-benefit analysis for each program element and that are consistent for all utilities; and
- Analysis of how Assembly Bill 1109 may affect their programs and the deployment of CFLs in California.

In response to the Commission's direction outlined above, the following results were achieved during PY2008:

#### LIEE Reporting Requirements

The LIEE monthly, quarterly, and annual reporting requirements were finalized by the Energy Division in 2007 to report program activities for PY2007 and PY2008. During 2008, SDG&E filed its monthly and quarterly reports to reflect its LIEE program activities in accordance with the final reporting requirements established by the Energy Division. In addition, this Annual Report is being filed in accordance to those reporting requirements established by the Energy Division.

#### Statewide Strategic Long-Term Plan

On June 2, 2008, the IOUs filed a joint statewide strategic long-term plan that included a plan to achieve the LIEE programmatic initiatives adopted in D.07-12-051

and consistent with D.07-10-032. The Commission published its final Strategic Plan for California in September 2008.<sup>9</sup>

#### 2009 – 2011 Low Income Program and Budget Application

In compliance with D.07-12-051, SDG&E filed Application (A.) 08-05-024 on May 15, 2008 to request approval of its LIEE program plans and funding for PY2009, PY2010, and PY2011. In its Application, SDG&E presented proposed modifications to its LIEE program which is designed to meet the Commission's key policy objectives of making LIEE a reliable energy resource and accomplishing the programmatic initiative of reaching 25% of all willing and eligible households in PY2009-PY2011. SDG&E's A.08-05-024 was approved by the Commission in D.08-11-031 issued on November 6, 2008.

D.08-11-031 directed post-decision action in 2008, amongst other things, for the utilities 2009-2011 LIEE program cycle. Specifically, D.08-11-031 directed the utilities to forecast the LIEE program "add back" measures that fall below the 0.25 cost effectiveness threshold test for the 2009 through 2011 program cycle, expand upon the program studies and pilots filed in its application, and revise the Statewide LIEE Policy and Procedures (P&P) Manual in accordance with the decision. In response to D.08-11-031, SDG&E 1) filed its "add back" measures with the Commission on December 8, 2008; 2) expanded on its LIEE program studies and pilots and filed an Advice Letter on January 5, 2009; and 3) SDG&E has been working jointly with the IOUs, Energy Division, and interested parties in A.08-05-022 et al to revise the LIEE P&P Manual in accordance with D.06-12-038 and D.08-11-031.

#### Quarterly Public Meetings

In D.06-12-038, the Commission directed the IOUs to sponsor quarterly public meetings to allow interested parties to share ideas and information that could facilitate improvements to the program elements, processes, and practices. During PY2008, the utilities jointly sponsored a meeting in each utilities respective service territory. The

<sup>&</sup>lt;sup>9</sup> California Long Term Energy Efficiency Strategic Plan published September 2008.

meeting notes were distributed to the members of the Low Income Oversight Board, attendees at the meeting, Energy Division staff, and any other parties requesting the meeting notes. The meetings were held on the following dates:

PG&E Service Territory: Discuss LIEE and CARE Programs – February 20, 2008

SoCalGas Service Territory: Discuss LIEE and CARE Programs – May 20, 2008

SDG&E Service Territory: Discuss LIEE and CARE Programs – August 13, 2008

SCE Service Territory: Discuss LIEE and CARE Programs – November 6, 2008

#### **Energy Education**

SDG&E continues to distribute collateral to and educate customers about the benefits of energy efficiency in an effort to reduce greenhouse gases and promote water conservation. This information includes simple steps customers can take to make their homes more energy efficient and ways to reduce water usage. In addition, SDG&E informs customers about the importance and impact of exchanging incandescent light bulbs for energy-saving CFLs to help lower annual lighting costs while also helping to reduce pollution. Information on how to safely dispose of CFLs to minimize harm to the customer and the environment is also included as part of the energy education.

#### Competitive Bid

D.06-12-038 directed SDG&E to conduct a competitive bid process for the administration of its LIEE program beginning in 2008. In compliance with D.06-12-038, SDG&E submitted its plans for conducting a competitive bid to the Commission's Energy Division on March 30, 2007. SDG&E filed a Petition for Modification (PFM) of D.06-12-038 on April 10, 2008 to request authorization to suspend the competitive bid process and allow SDG&E to retain RHA its prime contractor as the administrator until the end of 2008. The Commission issued D.07-06-004 which, among other things, granted SDG&E's PFM and directed SDG&E to present a plan to the Commission's Energy Division no later than March 30, 2008 for conducting a competitive bid process and it also granted SDG&E's request to retain RHA as the administrator until December 31, 2008. Subsequently, SDG&E elected to administer its LIEE program beginning in 2009 in lieu of it being conducted by a third party.

#### Measurement and Evaluation (M&E) Activities

#### **Energy Savings Methods Used for PY2008**

In Ordering Paragraph 9 of D.05-12-026, the Commission, without adopting or approving the results, authorized the use of the Impact Evaluation of the 2001 Statewide Low Income Energy Efficiency Program for calculating the energy savings for the LIEE program activities on a case by case basis until the Commission can address and resolve Low Income Energy Efficiency-related issues in the 2006 Annual Earnings Assessment Proceeding. To determine the energy savings for PY2008, SDG&E has utilized several measurement and evaluation methods adopted by the Commission to calculate the measure savings. SDG&E has used the 2001 LIEE Load Impact study measure evaluation data, the LIEE measure cost effectiveness study, the database for energy efficiency resources (DEER), and the measure assessment conducted by the LIEE Statewide Standardization Project Team. <sup>10</sup>

#### Other Program-Related Survey and Research

SDG&E conducts quarterly customer satisfaction surveys to gain customer feedback on various aspects of their experience with the LIEE program. Customers are asked to rate areas such as the enrollment process, installations, and inspections. Results from the survey are then used to measure and improve customer satisfaction and processes. SDG&E continued to conduct classroom training with contractors and field personnel to review the survey results and reinforce the importance of excellent service. Strategies and tips on how to improve satisfaction ratings are also discussed by sharing specific comments from customers and identifying areas for improvement.

The LIEE program continued to receive high ratings from program participants.

Overall satisfaction with SDG&E's LIEE services remained high, both on a quarterly and annual basis. On a 10-point scale (10 being the highest score), 92% of customers rated the service they received as an 8, 9 or 10. Customers were pleased with both the

<sup>&</sup>lt;sup>10</sup> . The 2007 LIEE energy savings are based on the following: 1) 2001 Low Income Impact Evaluation Study; 2) D.03-11-020 approved the "LIEE Measure Cost Effectiveness Study" conducted by Itron, Inc. filed on June 2, 2003 for new measure mix effective 1/1/04; 3) D.05-12-026 approved the "Report on the Assessment of Proposed New Year 2006 LIEE Program Measures" conducted by Itron, Inc. filed on May 2, 2005; and 4) the DEER.

quality of the work and the demeanor of the service personnel. Most customers are "more comfortable" as a result of the repairs/installations. In addition, customer satisfaction increased by two points from 2007 to 2008 (90% to 92%), which is the highest rating since the study's inception in 2002.

In addition to the quarterly surveys, SDG&E also conducted focus groups with its Outreach and Assessment Contractor's Energy Specialists (ES) to solicit feedback on concerns or challenges they may be experiencing first hand from customers. Findings from the ES focus groups resulted in program collateral improvements, including the addition of clearer and more valuable information.

#### LIEE Program Name and Tagline Research

In response to Commission direction in D.07-12-051, the joint IOUs conducted focus groups in various areas of each utility's service territory to help establish a single LIEE program name and tagline for the LIEE program. Focus groups participants were asked to evaluate a list of names and program descriptor allowing utilities to gauge their reactions to potential names/descriptions for the program. The objectives of the focus groups also included:

- Identifying the energy saving methods customers are currently using (aside from those in the programs presently sponsored by their utility);
- Probing awareness and understanding of the LIEE program; and
- Gaining insight on customer impressions of the LIEE program.

On July 1, 2008, SDG&E (as well as the other IOUs) submitted at response to an assigned Commissioner's Ruling dated June 13, 2008. In its response, among other things, SDG&E recommended the following as the new program name and tagline:

Name: Energy Savings Assistance Program

Tagline: A no-cost energy savings program for qualified renters and homeowners.

In D.08-11-031, the Commission addressed the Joint Utilities' July 1, 2008 filing and because it plans to engage marketing professionals and others to develop the statewide

ME&O program the Commission determined that it is premature to decide whether the IOUs proposal is acceptable.

Further in D.08-11-031, the Commission directs the IOUs to stay abreast of developments on the ME&O program as part of the general Energy Efficiency proceeding.

#### CBO, Leveraging and Access to Community Services

In D.01-05-033, the Commission directed utility program administrators to use the funding authorized for LIEE and appliance replacements to leverage the programs provided through DCSD's network of community-based organizations to customers within their service territories. Per D.01-05-033, the utilities could conduct leveraging with the following three approaches:

- "The utility can purchase equipment and appliances in bulk and have a LIHEAP provider install them in eligible low income homes within the utility service territory, along with additional weatherization measures provided by LIHEAP."
- "The utility can contract directly with a LIHEAP provider to deliver the LIEE program, so that LIHEAP provider can use funds from both LIEE and LIHEAP to provide a comprehensive set of services."
- "The utility can enter into a memorandum of understanding with LIHEAP providers to complete units in a coordinated manner, using LIEE contractors to install measures not provided under LIHEAP."

In an effort to ensure that the network of community-based providers are fully and effectively utilized, D.01-05-033 also directed the utilities to also use LIEE funds to leverage low income weatherization services provided by non-LIHEAP community service providers, under certain circumstances.

#### D.01-05-033 states:

"[I]f there are no LIHEAP providers or non-LIHEAP community-based organizations that can, or are willing to, provide weatherization services in a particular geographic area, then utilities also have the option to

implement today's rapid deployment strategy with other types of service providers, including private contractors. We provide the utilities considerable flexibility in deciding of the three approaches, and in what combination, to employ. In this way, a utility can develop the leveraging strategy that is most compatible with its existing delivery system.

The leveraging approach we adopt today will require a shift in thinking within the utility program infrastructure. Instead of considering the LIEE program as a stand-alone activity that provides referrals to DCSD programs, utility administrators and their contractors also need to view the LIEE program as a leveraging vehicle to rapidly expand and enhance the delivery system in place through DCSD's network of LIHEAP providers. We believe that this shift in thinking is warranted by the dire situation facing low income customers during the energy crisis, and needed to ensure the efficient and effective deployment of all of the State's resources appropriated for this purpose."<sup>11</sup>

In accordance with the above provisions set forth in D.01-05-033 to deploy a leveraging vehicle to expand and enhance the delivery system of the LIEE program, SDG&E has utilized a variety of the leveraging scenarios described by the Commission.

In 2008, SDG&E used the following leveraging efforts to service low income customers:

#### CBO Participation

SDG&E contracted RHA to market and manage field services under its LIEE program. In PY2008, RHA subcontracted two CBO's: (1) Campesinos Unidos, Inc. (CUI) and (2) Metropolitan Area Advisory Committee (MAAC) and three private

<sup>&</sup>lt;sup>11</sup> D.01-05-033 at page 5 and see Conclusions of Law 4 through 7.

companies: (1) Capital State Construction, (2) Rancho Energy Services Co. (RESCO), and (3) American Insulation to provide weatherization services.

RHA also subcontracted with seven licensed HVAC contractors to provide natural gas furnace repair and replacement services offered through the program. The HVAC subcontractors participating in PY2008 included: (1) Ameri-Mex, (2) ARS of San Diego, (3) DM Mechanical, (4) Jerry's Heating & Air Conditioning, (5) Lloyd's Plumbing, (6) South Bay Mechanical, and (7) Tierrasanta Heating & Air Conditioning (Table 5 reflects the level of participation by contractor type).

#### **Leveraging**

California LIHEAP Block Grant weatherization and bill assistance efforts are funded by the Federal Department of Health & Human Services (DHHS) and provides the following types of services through the DCSD:

- Financial Assistance to offset the costs of heating and/or cooling dwellings;
- Weatherization measures to improve the energy efficiency of the dwelling;
- Education to assist the customer in identifying conservation opportunities; and
- Appliance replacement primary range/oven and installation of microwaves and ceiling fans.

CBOs are eligible to apply for federal funding to install weatherization measures under the LIHEAP Block Grant Program. In SDG&E's service territory CUI, MAAC and Community Partnership of Orange County (CAPOC) participated in the LIHEAP program and leveraged work with SDG&E's LIEE program as appropriate.

#### Access to Other Low Income Services

SDG&E continued to utilize its existing LIEE referral systems to assess the needs of low income customers participating in the LIEE program, and refer them to the appropriate CBO and other community agencies. RHA and their subcontractors continue to identify both the energy and non-energy needs of the low income customer. Their field personnel are trained to look for opportunities to make referrals to utility programs, state energy programs, and community agencies throughout the initial

screening and assessment, application process, energy education and installation of weatherization measures and appliances. The types of non-energy services provided by community agencies in SDG&E's LIEE program include:

- Emergency Food & clothing
- Shelter & Housing
- Employment counseling
- Job Training
- Cultural Activities
- High School equivalency, English as a second language and math instruction
- Disaster Relief Information
- Translation Services
- Health Services
- Bill payment assistance

### **Local Government and Community Partnerships**

In 2008, SDG&E's Regional Public Affairs (RPA) team reached out to several cities in San Diego County. Joint meetings were held with RPA, LIEE and city representatives from Poway, San Marcos, Escondido and Chula Vista to identify opportunities to work together to promote SDG&E Customer Assistance programs within these cities. Each of the cities increased their outreach efforts in 2008, either through their re-development departments or through SDG&E Energy Efficiency Partnership programs. These partnerships worked well because more residents of these cities were qualified for Customer Assistance programs due to the declining economic conditions. These partnerships will continue to be developed in 2009, as we anticipate even more customers will need help due to the current recession.

Community Partnerships continue to be an important part of the outreach strategy for the LIEE Program. These partners are serving the same communities that LIEE needs to reach and through this joint effort hard-to-reach customers are being brought into the programs.
