SCHEDULE EV-TOU-3

DOMESTIC TIME-OF-USE FOR ELECTRIC VEHICLE CHARGING
WITH A DUAL METER ADAPTER

SPECIAL CONDITIONS

1. Voltage. Service under this schedule will be supplied at the standard lighting voltage.
2. Metering. The point of service must contain facilities to separately meter EV charging facilities and/or compressed natural gas (CNG) refueling facilities. The customer will supply and own all associated facilities necessary to separately meter EV charging facilities and/or CNG facilities. The utility will provide a Dual Meter Adapter to facilitate metering under this tariff and another Domestic Service tariff. The utility will own and maintain the meters utilized for billings. In addition, and for purposes of monitoring customer load, the utility may install at its expense, load research metering. The customer shall supply, at no expense to the utility, a suitable location for meters and associated equipment used for billing and for load research.
3. Failure of Meter Timing. Should the timing device on the meter fail causing the On-Peak and Off-Peak energy consumptions to be incorrectly registered, the customer will be billed on the consumption, as registered, on the otherwise applicable domestic schedule.
4. Terms of Service. A customer receiving service under this schedule may elect to change to another applicable rate schedule but only after receiving service on this schedule for at least 12 consecutive months. If a customer elects to discontinue service on this schedule, the customer will not be permitted to return to this schedule for a period of one year.
5. Qualification for Schedule EV-TOU-3. Customers taking service under Schedule EV-TOU-3 must demonstrate eligibility to the satisfaction of the utility.
6. Optional Billing - Utility Option. The utility may, at its option, provide all new Schedule EV-TOU-3 customers the lower of the bill under this schedule or the bill under their regularly applicable non-TOU schedule for three consecutive months. This option is solely the utility's and shall in no way obligate the utility. If after being served under this optional billing provision, the customer elects to continue service on Schedule EV-TOU-3, the customer will be required to continue service on this schedule for 12 consecutive months before receiving service on another schedule.
7. CARE Customers. Qualified CARE Customers electing to receive service on this schedule will be exempt from both the TOU Metering Charge and the Dual Meter Adapter Charge.

SPECIAL CONDITIONS

8. Billing: A customer's bill is first calculated according to the total rates and conditions listed above. The following adjustments are made depending on the option applicable to the customer:

- a. **UDC Bundled Service Customers** receive supply and delivery services solely from the Utility. The customer's bill is based on the Total Rates set forth above. The EECC component is determined by multiplying the EECC price for this schedule during the last month by the customer's total usage.
- b. **Direct Access (DA) and Community Choice Aggregation (CCA) Customers** purchase energy from a non-utility provider and continue to receive delivery services from the Utility. The bills for a DA and CCA Customer will be calculated as if they were a UDC Bundled Service Customer, then crediting the bill by the amount of the EECC component, as determined for a UDC Bundled Customer, and including the appropriate Cost Responsibility Surcharge (CRS), if applicable.

Nothing in this service schedule prohibits a marketer or broker from negotiating with customers the method by which their customer will pay the CTC charge.

9. Other Applicable Tariffs: Rules 21, 23 and Schedule E-Depart apply to customers with generators.
