

Get to know your power

Help California prevent power outages this summer. Participants get paid for reducing energy use during times of high demand and emergencies, with the goal of avoiding rotating outages. Participation is voluntary and there are no penalties for not reducing energy.

Introduction of program

The Power Saver Rewards Program pays SDG&E residential customers to voluntarily reduce their overall energy use when demand is highest.

Benefits for you and your business

Participants in the Power Saver Rewards Program will receive a bill credit of \$2.00 per kWh for reducing energy use during a Flex Alert or other statewide grid emergency.

Who is eligible to participate?

Any residential electric SDG&E customer with a smart meter. Residential customers cannot be a participant of another SDG&E incentive program such as AC Saver, Capacity Bidding or a third-party program. Refer to official terms and conditions for more detail. Residential customers participating with a Community Choice Aggregator (CCA) or Direct Access (DA) are eligible for the program.

How does the program work?

During a grid emergency, California Independent System Operator (CAISO) will call a Flex Alert. When this occurs SDG&E will call a Power Saver Rewards Program event and notifications will be sent out a Day-Ahead of the event.
