

SGIP Program Historical Goals

SGIP's 3 Program Goals

1. Grid Support & Peak Load Reduction. Improve the efficiency and reliability of the Transmission and Distribution system, and lower infrastructure cost.
2. Environmental. Reduce greenhouse gasses (GHGs) and criteria air pollutants. (Third-party evaluator measures annually)
3. Market Transformation. Support technologies that have the potential to thrive in future years without rebates. Incubator concept.

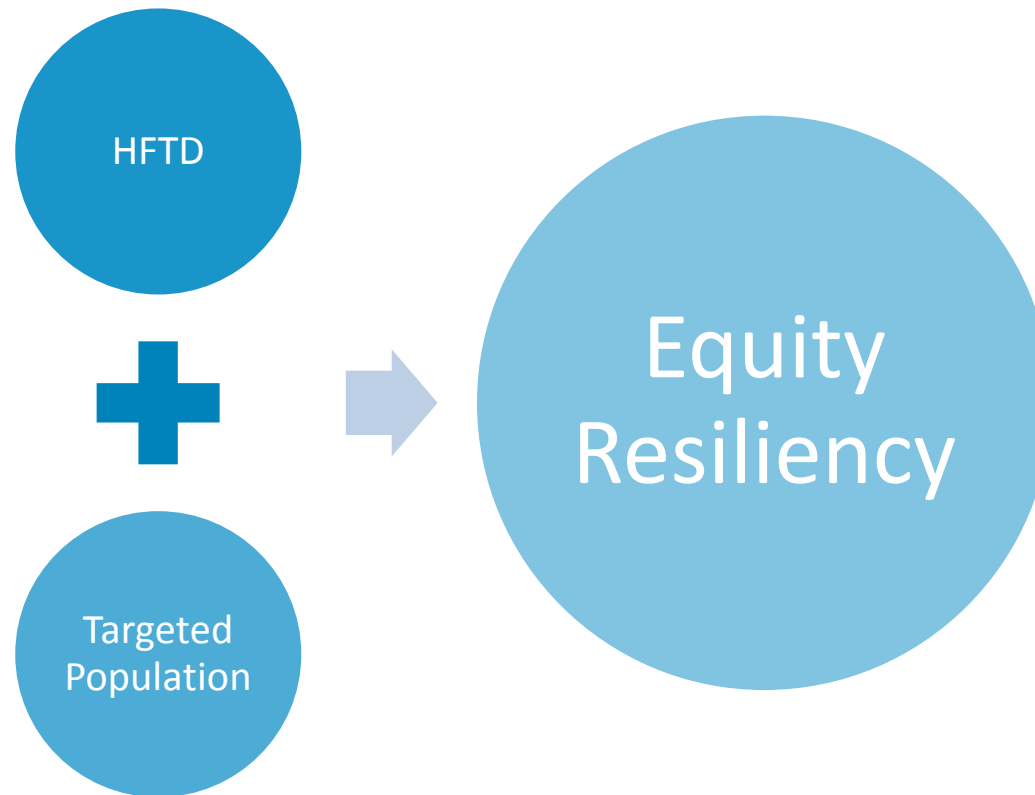

SGIP Program Now – Focus: Resiliency

- SGIP incentives are available for all Residential and Non-Residential customers.
 \$0.25/Wh & \$0.40/Wh, respectively
- Higher incentives are available for “Equity”-qualifying customers.
 \$.85/Wh for Residential
- Even *higher* incentives for Equity customers in HFTDs that have been affected by PSPS. These are *Equity Resiliency Budget* customers.
 \$1.00/Wh! Can offset 100% of project.

PG&E is also implementing a Financial Assistance Pilot to support low income medically dependent customers in High Fire Threat Districts

Customer must meet both

Equity Resiliency – HFTD

CPUC Fire map <https://ia.cpuc.ca.gov/firemap/#>

Search by address

Customers impacted by 2 discrete PSPS Events are also eligible

Financial Assistance – Target Audience

Financial Assistance Pilot supports low income Medical Baseline customers
Vulnerable customers that are not likely to take part in SGIP
Most impacted by upfront payment requirements

15k Customers – income qualified MBL in high-fire threat Tier 2 or 3

Upfront cost is a significant barrier

Unfamiliar with SGIP and battery technologies

How to qualify for a home battery

You're a customer on Medical Baseline*

OR

You've notified PG&E of a medical condition that could be life-threatening if power is lost

OR

You're income-qualified**

AND

You live in a high-fire threat Tier 2 or 3 district

OR

You've lost power in a PSPS two or more times

Developers can obtain 50% of the Incentive upfront for these projects.
Target Customers have received direct mail and email outreach.
