

SDG&E 2016 Preferred Resources LCR RFO

Questions & Answers / FAQs

Renewables Product Type Specific Questions

- 1. Please confirm that WDAT projects that are actively being studied under the Cluster Study Process will be considered. Specifically, projects that have entered during the April 1 - April 30, 2016 window and are wholly capable of meeting the January 2018 through 2022 COD goals will be eligible for full consideration.**

See interconnection question #3

- 2. What product type should PV go in?**

Either Renewable or DG depending on the configuration of the system. It cannot be bid as DR as that product type needs to be dispatchable and nearly all PV systems SDGE is aware of are not dispatchable. If it is going to be bid as DG, you must contact us before the Q&A deadline at PrefResourcesRFO@semprautilities.com to discuss.

- 3. Please give more details on "incremental"?**

See General FAQ #18

- 4. Will SDG&E place any value on firming intermittent resources in the NMV calculation?**

See FAQ evaluation question #8.
