

SDG&E 2018 Independent Evaluator RFP Questions & Answers

1. How many firms do you expect to contract with as IEs?

The number of IEs is typically around 3-5 dependent upon forecasted procurement needs.

2. What are the nature and frequency of evaluations for which you expect to need IEs in the 2019-21 period?

SDG&E anticipates launching approximately 10-15 solicitation from 2019 through 2021.

3. "Company A" has nearly 7,000 employees in multiple industry verticals and layers of our clients' businesses. As such we have found it necessary to employ internal firewall mechanisms such as geographic location, data segmentation, and personnel segmentation by client and project type and internal project processes to mitigate potential conflicts of interest when multiple groups are working for the same client in different areas of their business. Additionally, "Company A" has a long history of engineering and consulting services with SDG&E. Does SDG&E see participating in this project preventing "Company A" from continuing to support any types of these projects?

The IE services provided for solicitations will not likely impact continuing support of any type on other projects/services.
