"Electricity Burden" is calculated as the electric bill divided by the estimated income for the customers within each kWh range. "Energy Burden" is calculated as the electric bill plus the average annual residential non-CARE gas bill divided by the estimated income for the customers within each kWh range. Income estimates are based on the 2010 Federal Information Processing Standards (FIPS) Census Tract and the associated median household income from the 2012 American Community Survey 5-Year Estimated from the U.S. Census Bureau.

"Electricity Burden" is calculated as the electric bill divided by the estimated income for the customers within each kWh range. "Energy Burden" is calculated as the electric bill plus the average annual residential CARE gas bill divided by the estimated income for the customers within each kWh range. Income estimates are based on the 2010 Federal Information Processing Standards (FIPS) Census Tract and the associated median household income from the 2012 American Community Survey 5-Year Estimated from the U.S. Census Bureau.

"Electricity Burden" is calculated as the electric bill divided by the estimated income for the customers within each kWh range. "Energy Burden" is calculated as the electric bill plus the average annual residential CARE gas bill divided by the estimated income for the customers within each kWh range. Income estimates are based on the 2010 Federal Information Processing Standards (FIPS) Census Tract and the associated median household income from the 2012 American Community Survey 5-Year Estimated from the U.S. Census Bureau.

"Electricity Burden" is calculated as the electric bill divided by the estimated income for the customers within each kWh range. "Energy Burden" is calculated as the electric bill plus the average annual residential CARE gas bill divided by the estimated income for the customers within each kWh range. Income estimates are based on the 2010 Federal Information Processing Standards (FIPS) Census Tract and the associated median household income from the 2012 American Community Survey 5-Year Estimated from the U.S. Census Bureau.

"Electricity Burden" is calculated as the electric bill divided by the estimated income for the customers within each kWh range. "Energy Burden" is calculated as the electric bill plus the average annual residential CARE gas bill divided by the estimated income for the customers within each kWh range. Income estimates are based on the 2010 Federal Information Processing Standards (FIPS) Census Tract and the associated median household income from the 2012 American Community Survey 5-Year Estimated from the U.S. Census Bureau.
