

A  Sempra Energy utility®

EcoChoice® is the cleaner, greener choice

*EcoChoice allows you to buy renewable energy, even if you don't own a home, can't afford the upfront cost of solar or cannot put solar panels on your roof.\**

### How **ecochoice** works

#### Did you know?

Signing up helps promote renewable energy in our region with no upfront installation costs and no disruption to your property, whether you rent or own.

**Local, Southern California renewable resources power EcoChoice. Today, nearly 45% of the energy you use comes from renewable sources.**

**With EcoChoice, you're in control and have the option to increase that amount. By enrolling in EcoChoice, you can allocate your electricity to renewable energy from 50% to up to 100% each month.**

**Support our environment. Reduce your carbon footprint. And, even save money!\*\*\***

Participation charges for this program depend on the cost of our EcoChoice renewable projects, which could result in an increase to your bill.

EcoChoice is Green-e Energy certified and meets the environmental and consumer protection standards established by the nonprofit Center for Resource Solutions. Learn more at [www.green-e.org](http://www.green-e.org)

To sign up for EcoChoice or get more information, visit [sdge.com/EcoChoice](http://sdge.com/EcoChoice) or call 1-800-411-7343.

\*Although renewable electrons cannot be delivered to a specific location, through your enrollment SDG&E purchases an amount of renewable energy to be delivered to the grid equivalent to your subscription.

\*\*Average residential customer using 500kWh a month at 100% EcoChoice subscription level can save about \$2.50 a month on their electricity bill. Rates are subject to change at any time. Terms and conditions apply.
