RFPs for Sale & Regl of SONGS

w/ JBA

RFP to Regl SONGS - 2010-22 time period

would need to subtract depld value.

we don't want a PPA \rightarrow syn
due to debt eqn. and impact
on our bond rating.

SDGE owned resource (unless renewable base loads
and operated (Not a PPA) (geothermal)

- Min Capx. min 60 MW (3%) up to full CC (600 MW)
excess would go toward our LTRP. P1
- Loc on our system if gas-fired
- TM to reach our system for renewable
- Largest size = 600 MW.
- Plant spec to match Palomar. (for synergy)
Need S&C to write equip specs or use old spec
- Linda known re which bus to connect to
for SONGS regl.
- Possibility to locate on Pensation (East of SONGS)
- Linda could calc trans adder cost for
bid locs (before or after RFP)
- May need to delay proceeding

(mid-late October).

Decom. Trust issue - the wants oversight.

- Topping up of NDT antie regt.
Use for Vop if avail, but need for Decentral Testimony
and attribution.

Joint arb w/ highest poss Vop - Then use RFP to suggest
resolution.

RFP would incent SCE to give us a good Vop via
delay threat.

Hold off on this for now - could create probs for Vop.
Do it later when Brown is known.

up - KC BTW file for Army.
