

## Natural Gas Rate Increase Alert

On August 28, 2025, SDG&E® filed [Advice Letter 3447-G](#) to revise gas transportation rates. This change is to recover costs from catastrophic emergencies, COVID-19 protections and pipeline safety work.<sup>1</sup> As a result, SDG&E’s bundled (gas transportation, public purpose surcharge and gas commodity)<sup>2</sup> residential average gas rates will increase by approximately \$0.01 cent/therm, or 0.4%, from \$2.70/therm to \$2.71/therm.<sup>3</sup>

Estimated Residential Bill Impacts <sup>4</sup> of All Approved Gas Rate Changes Effective September 1, 2025				
Type of Customer	July 2025 Average Monthly Bill <sup>5</sup>	September 2025 Bill Increase (\$) <small>transportation and public purpose surcharge increase</small>	September 2025 Average Monthly Bill	% Bill Increase
Non-CARE	\$65.62	+\$0.06	\$65.68	0.09%
CARE	\$43.64	+\$0.04	\$43.68	0.09%

Customers enrolled in the CARE (California Alternate Rates for Energy) program receive a 20% discount on their bill.

### Primary drivers for this rate increase include the following:

- Inclusion of revenue to recover approved costs related to SoCalGas’s Catastrophic Emergency Memorandum Account (CEMA).
- Inclusion of revenue to recover approved costs related to SoCalGas’s COVID-19 Pandemic Protections Memorandum Account (CPPMA).
- Inclusion of revenue to recover approved costs related to SoCalGas’s Distribution Integrity Management Program Balancing Account (DIMPBA).

<sup>1</sup> This revision is for the Implementation of SoCalGas’s Incremental Rate Recovery for Catastrophic Emergency Memorandum Account (CEMA), Covid-19 Pandemic Protections Memorandum Account (CPPMA), and Distribution Integrity Management Program Balancing Account (DIMPBA). Due to system-wide averaging rate-making procedures adopted in D.24-07-009, SDG&E’s transportation rates are being updated to reflect the update being made to SoCalGas’s gas transportation rates.

<sup>2</sup> Natural Gas Transportation Service transports gas from “City Gate to meter.” The Backbone Transportation Service (BTS) is for service from Receipt Point to City Gate. Public Purpose surcharge pays for public goods programs. Commodity charges are the gas of cost and changes monthly.

<sup>3</sup> Core procurement rates are established monthly and may be higher or lower.

<sup>4</sup> The \$54.21 gas climate credit for 2025 was included in April bills and is not included as part of the average bills included in the table.

<sup>5</sup> Non-CARE bill estimate based on a typical non-CARE customer average monthly usage of 25 therms per month. CARE bill estimate based on a typical CARE customer average monthly usage of 22 therms per month. Usage in colder months, like January, typically exceeds the average monthly usage, which would result in higher bills for those months than reflected.
