

**SAN DIEGO GAS & ELECTRIC COMPANY
SOUTHERN CALIFORNIA GAS COMPANY
NORTH-SOUTH PROJECT REVENUE REQUIREMENT
(A.13-12-013)
(1ST DATA REQUEST FROM TURN)
Revised Response dated August 5, 2014 to Question 2**

QUESTION 2:

Please provide 10 years of historical data (2013-2004) showing the MMcfd and MMbtu curtailed on the Southern System due to the inability of SCG to move gas from the Northern System to the Southern System. Please provide the data on a daily basis for each year in machine readable form (Excel spreadsheet).

RESPONSE 2

One such curtailment occurred during the referenced time period, on February 3, 2011 due to the lack of Southern system supplies. The total estimated volume curtailed, i.e. noncore customers asked to reduce or stop consumption, was 200 MMcf, of which approximately 131 MMcf was interruptible service and 69 MMcf was firm service.
