Through SDG&E's Business Energy Solutions (BES) program we offer public sector customers no-cost energy audits helping to identify and implement energy-saving upgrades such as LED lighting, commercial refrigeration, kitchen equipment and more.

Investing in energy-efficient equipment allows you to:

- Extend equipment life, improve reliability and reduce maintenance costs
- Offset new equipment costs and speed up your return on investment with rebates

In addition to helping you save instantly with a no-cost energy audit, this program also offers:

- **Peace of mind:** We set you up with an SDG&E-authorized contractor who will perform the audit and make recommendations based on the size and scope of the project. The contractor stays with the project from the beginning to the end and will help with recycling old equipment.
- **0% Financing:** To help you take advantage of energy-efficient upgrades, we offer qualified customers On-Bill Financing. This allows you to pay for improvements through your SDG&E® bill with a zero-percent interest loan. Learn more at sdge.com/OBF.

"It's a no-cost energy audit, SDG&E can recommend contractors to do the work and it can be done through On-Bill Financing with 0% financing. That was huge. It allowed us to be able to do it."

– Patty Ungar DVM, CVA
Owner, Kensington Veterinary Hospital

NOTE: As of Jan 1, 2021 the BES program is only available for public sector customers.

Program requirements

- Current SDG&E service account
- Small to mid-size public sector customers (non-residential)
- Monthly electrical demand of under 200 kW over the last 12-month period
