**NOTIFICATION OF
SAN DIEGO GAS & ELECTRIC
COMPANY'S REQUEST TO INCREASE RATES
FOR THE 2019 SALES FORECAST
APPLICATION NO. A.18-03-003**

On March 1, 2018, San Diego Gas & Electric Company (SDG&E®) filed a request with the California Public Utilities Commission (CPUC) for approval to increase overall rates for its forecasted electric sales for 2019. Electric sales forecasts provide details on how much electricity SDG&E customers are expected to use for the upcoming year. Accurately forecasting the amount of electricity that will be used is important so SDG&E does not overcharge, or undercharge for service.

If approved, the 2019 Sales Forecast will be used to change electric rates to more accurately reflect the cost of electric service for various customer classes and associated rate options. This rate change is expected to take effect January 1, 2019. Although the application proposes no change to SDG&E's overall revenue requirement, adoption of the 2019 Sales Forecast will lead to rate increases for certain electric customers and decreases for other electric customers. In 2019, SDG&E's overall electric sales (18,349 gigawatt hours-GWh) are expected to decline by 5.4% when compared to currently adopted electric sales (19,403 GWh). Due to the decline in electric sales, SDG&E is requesting to increase rates to recover the designated revenue requirement.

ESTIMATED IMPACT ON ELECTRIC RATES

If the CPUC approves SDG&E's request, a typical non-CARE residential customer living in the inland climate zone and using 500 kilowatt-hours per month could see a monthly summer bill increase in 2019 of \$7.87, or 5.1%. A typical current monthly bill could increase from \$155.09 to \$162.96. The percentages shown do not necessarily reflect the changes that you may see on your bill. Changes in individual bills will also depend on how much electricity each customer uses. This will be an increase for every customer class except Small Commercial.
