NOTIFICATION OF SAN DIEGO GAS & ELECTRIC COMPANY'S REQUEST TO DECREASE ELECTRIC RATES NO. A.21-04-010

WHY AM I RECEIVING THIS NOTICE?

On April 15, 2021, San Diego Gas & Electric Company (SDG&E®) filed the 2022 Energy Resource Recovery Account (ERRA) Forecast Application with the California Public Utilities Commission (CPUC) for approval to decrease electric rates. This application is requesting a total rate decrease estimated to be \$468.3 million (or 40.3%).

New rates will begin on January 1, 2022, for a 12-month period ending December 31, 2022.

HOW DOES THIS IMPACT MY BUNDLED ELECTRIC RATES?

Most customers receive bundled electric service from SDG&E, meaning they receive electric generation and distribution services. A summary of the rate impact for these customers is provided in the table below.

If SDG&E's rate request is approved by the CPUC, the average monthly bill for a typical non-California Alternate Rates for Energy (CARE) bundled residential customer using 425 kilowatthours (kWh) is estimated to decrease \$22.15, or 16.62%, from \$133.30 to \$111.15, per month in 2022.

System Total	27.502	22.750	4.752	17.28%

¹ UDC rates include California Wildfire Fund. Wildfire Fund replaced DWR-BC on 10/1/2020. Due to system limitations, the labeling of DWR-BC will not change until 2021.

HOW DOES THIS IMPACT MY NON-BUNDLED ELECTRIC RATES?

Non-bundled customers include Direct Access (DA), Community Choice Aggregation (CCA) and other departing load customers who only receive electric distribution services from SDG&E. This application includes a portion of the rate decrease requested above, which is recoverable through the Power Charge Indifference Adjustment (PCIA). A summary of the rate impact, which is a rate decrease estimated to be \$211.9 million (or 46.4%), for these customers is provided in the table below.

If SDG&E's rate request is approved by the CPUC, a non-bundled residential 2021 PCIA Vintage customer using 425 kWh per month could see a monthly bill decrease of \$6.27, or 32.67%, from \$19.20 to \$12.92 from the PCIA charge per month in 2022. The PCIA charge is one charge amongst many on non-bundled customer bills and is the only charge that will decrease. Individual customer bills may vary. PCIA rates for Vintages 2001-2020 are not shown below but will also decrease.

For other customer classes in the 2021 PCIA Vintage, the monthly bill decrease from the PCIA charge can be estimated by multiplying the "PCIA Rate Decrease" applicable to their customer class from the table below by their typical kWh usage per month. A customer's actual kWh usage per month can be found on the right-hand side of the first page of customer bills in the section titled "Electric Usage History."
