

Power Your Drive for Fleets

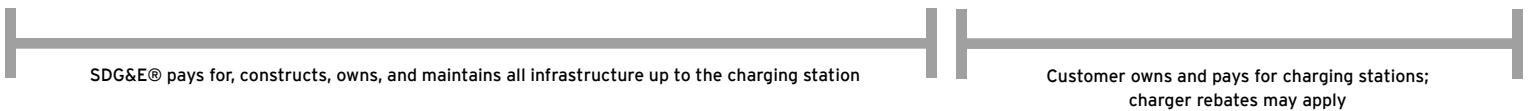

Helping Regional Fleets Move Towards Electrification with Incentives & Rebates

Regional fleets that move goods to and from warehouses, distribution centers, import/export facilities, manufacturing complexes, and retail centers are well positioned to benefit from significant total cost of ownership savings by transitioning to electric vehicles (EVs). SDG&E's **Power Your Drive for Fleets** program provides incentives and rebates to assist these diverse fleet operations in taking advantage of the growing number of electric vehicle and equipment product offerings. Fleets can also get ahead of the state's proposed zero-emission transport refrigeration unit (TRU) regulation and the mandate requiring all medium- and heavy-duty trucks operating in the state be zero emission by 2045.

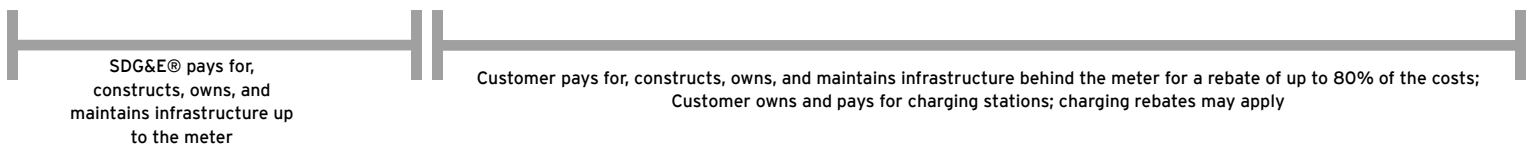

INFRASTRUCTURE INCENTIVES

Option 1: SDG&E-Owned No Cost Installation

Option 2: Customer-Owned Rebates to Reduce Installation Costs

ELIGIBLE VEHICLE TYPES

A diverse mix of on-road and off-road, medium- and heavy-duty vehicle types to support fleets in disadvantaged communities are eligible for the Power Your Drive for Fleets program, including:

HEAVY-DUTY

Goods movement (Class 7-8)

MEDIUM DUTY

Delivery & shuttle (Class 2-6)
>6,000 LBs

OFF-ROAD

Forklifts (Class 2 or higher)
>6,000 LBs

Transport refrigeration units

Yard trucks

PROGRAM OVERVIEW

\$107 million

budget over 5 years

300+ customer sites

commercial and private fleets

3,000+ new EVs

on- and off-road Class 2-8

CHARGER REBATES

You can select from a variety of EV charger options from our **approved vendor list**. School buses, transit buses, and sites located in disadvantaged communities that are not a Fortune 1000 company are eligible for the EVSE rebates based on the power output of the charger.

[Use our rebate calculator to see how much you could save »](#)

Maximum rebate amounts per charger power level

EVSE power	Max. rebate amount*
Up to 19.2kW	\$3,000 per charger
19.3kW up to 50kW	\$15,000 per charger
50.1kW up to 150kW	\$45,000 per charger
150.1kW and above	\$75,000 per charger

*Eligible sites will receive a rebate for each qualified charger for the lesser of 50% of the cost of the charger or the maximum amount based on power output as detailed above, not to exceed 50% of the cost of the charger.

PROGRAM REQUIREMENTS

Demonstrate commitment to procure **a minimum of 2 electric vehicles**

Demonstrate **long-term electrification growth** plan and schedule of load increase

Provide data related to charger usage for a minimum of **5 years**

Own or lease the property where chargers are installed, and operate and maintain vehicles and chargers **for minimum of 10 years**
